Maintenance Bundles provide a cost effective solution to those customers seeking a moderate amount of change to be made to their web solution, usually over a period of time. Web sites are evolving entities and as such should grow and adjust to the various needs of the site's users. Maintenance Bundles simply allow savings to be a part of this essential process.

How It Works

To enable your organization to be a phone call away from new ideas, choose a Maintenance Bundle from the list below and notify your dedicated Archose Solutions Architect. The bundle will be added to an existing invoice or billed separately. The maintenance time provided by your Bundle will then be added to your maintenance pool. Purchasing multiple bundles simply adds more time to your pool. Don't worry, we'll keep track of how much time you have. To utilize your maintenance time, simply:

1. Contact your dedicated Archose Solutions Architect.
2. Your Solutions Architect will provide the approximate number of hours needed.
3. If you choose to accept...
4. Archose delivers.

What You Get

When purchasing a Maintenance Bundle, you remove the burden of having to be familiar with web technologies and allow a better use of your organizations time and resources to be focused elsewhere. Let Archose provide you with the service you already trust at a discounted rate. Compare the *Current Rate* with the *Cost Per Hour* provided by a Maintenance Bundle and see the savings. Also, the time purchased with your Bundle is fully transferable between projects and never expires!

Choose A Bundle

Choose a bundle today and give your organization a cost effective means of taking the headache out of web site evolution.

Maintenance Time	Cost Per Hour	Bundle Price	Savings
5 hours	$22.40	$112	10%
15 hours	$20	$300	20%
25 hours	$17.52	$438	30%

Current Rate
$25/hour
